

THE FUTURE OF CREATIVE EDUCATION

Become a Digital Architect

GLIMU INSTITUTE · AFRICA'S PREMIER INSTITUTE OF MEDIA
TECHNOLOGIES

Don't just learn a skill. Master the complete pipeline. Conceive the idea,
design the interface, write the code, and produce the content.

Diploma in Full-Stack Media Production **1 Super Course • 3 Tracks**

The Curriculum Journey

From a shared foundation to specialized expertise.

1st Session

The Common Trunk

All students start together. We build a shared language so coders, media creators & designers understand each other.

- Institute Fundamentals & Ethics
- Visual Research & Logic
- Storytelling & Media Literacy
- Design Fundamentals (Color, Type)
- Coding Basics (Web)
- Project Management

2nd Session

Choose Your Track

In the 2nd session, you dive deep into your passion (60%) while maintaining literacy in the other disciplines (40%).

-  **Media Focus: Cinematography, VFX, Sound.**
 -  **Design Focus: UI/UX, Branding, Animation.**
 -  **Tech Focus: Full-Stack, Cloud, DevOps.**
-
-  **The Capstone: Cross-functional Project.**

Government Approved

Fully recognized. Eligible for employment within & outside our network.

Diploma in Full-Stack Media

One Diploma. Three Tracks. Unlimited Possibilities.

The Digital Architect Program

A Super program designed to produce graduates who can build products from concept to deployment without relying on external departments.

Media Track

Focus on video production, editing, and storytelling.

Design Track

Focus on user interfaces, designing, and animations.

Tech Track

Focus on software development and infrastructure.

Why This Model Works

Agile Collaboration

Learn to work in cross-functional teams just like in top tech companies.

Reduced Bottlenecks

You don't have to wait for a developer or designer. You can execute yourself.

The Capstone Merger

Real-world proof that our model works.

Project: "StreamLine" Platform

A student-led initiative to launch a local streaming platform. Watch how the three tracks merged to create a single product:

Tech Track Built the Engine

Developed the React Native App interface and the AWS backend database infrastructure.

Design Track Created the Face

Designed the user experience (UX), logo, visual identity, and marketing assets.

Media Track Filled the Screens

Produced launch videos, store screenshots, and promotional content.
